OMEGA 3

EPA 400 mg + DHA 200 mg

EXTREMELY PURE FISH OIL

240 softgels of Omega 3 is ideal for various age groups. With the ideal ratio of 40% EPA and 20% DHA per pill. EPA and DHA contribute to normal cardiac function. DHA helps maintain normal brain function and vision.

SUSTAINABLE FISHING

The fishing grounds, mainly located in Peru and Norway, are among the cleanest in the world. The type of fish used is the Peruvian anchovy (*Engraulis ringens*). All raw fish oil from anchovy is obtained through 100% sustainable fishing and is certified by IFOS, which guarantees an adequate concentration of the active ingredients EPA and DHA.

THE BEST QUALITY

Swissisimi Omega 3 is pure thanks to a multiple molecular distillation process to which it is subjected to minimize the presence of heavy metals. 100% natural, pure and clean.

BEST BIOAVAILABILITY

Without the controversial additive magnesium stearate (magnesium salts of fatty acids) for OPTIMAL EFFECTIVENESS. They are very simple to ingest, even if it is recommended to help yourself with a little water, and are also quickly assimilated by the body.

1 capsule per day: 250 mg of EPA and DHA are useful for normal CARDIAC FUNCTION.

2 capsules per day: 500 mg of DHA help maintain BRAIN FUNCTION and contribute to maintaining VISUAL CAPACITY in good conditions.

4 capsules per day: 2 g of EPA and DHA contribute to the maintenance of normal levels of TRIGLYCERIDES in the blood.

5 capsules per day: 3 g of EPA and DHA contribute to the maintenance of normal BLOOD PRESSURE.

PURIFICAZIONE E FILTRAZIONE
Purification and filtration:
The raw material goes through an extrification process which makes the fish oil more concentrated than the original raw material.

DISTILLAZIONE MOLECOLARE
Molecular distillation:
Our gentle purification method removes impurities such as heavy metals, pesticides and PCBs.

RIMOZIONE DELLE TORBIDITÀ
Turbidity removal:
During a further filtration process, the cloudiness of the natural long-chain and saturated fatty acids of the fish oil is reduced.

RIDUZIONE DELL'ODORE
Odor reduction:
In the final filtration process the fishy odor and volatile components of the fish oil are reduced.

PRONTO PER LE CAPSULE
Ready for capsule:
The purified and highly concentrated Omega3 oil is now ready to fill the capsules.
